

Edited Book Name

Advances in Multidisciplinary Research: Integrating Technology, Health, Education, Environment, and Social Change in the Modern Era

SUB THEMES

- Artificial Intelligence and Emerging Technologies
- Digital Transformation in Business and Society
- Smart Healthcare Systems and Digital Health
- Public Health, Preventive Care, and Healthcare Management
- Medical Innovations and Healthcare Technologies
- Educational Technology and Digital Learning
- Artificial Intelligence in Education
- Curriculum Innovation and Future Learning Models
- Higher Education Reforms and Quality Enhancement
- Sustainable Development and Environmental Management
- Climate Change, Adaptation, and Resilience
- Renewable Energy and Green Technologies
- Environmental Conservation and Biodiversity
- Circular Economy and Sustainable Resource Management
- Smart Cities and Sustainable Urban Development
- Innovation, Entrepreneurship, and Start-up Ecosystems
- Industry 4.0 and Industry 5.0 Applications
- Data Science, Big Data, and Business Analytics
- Cybersecurity, Privacy, and Digital Governance
- Internet of Things (IoT) and Intelligent Systems
- Blockchain and Financial Technologies (FinTech)
- Social Innovation and Community Development
- Gender Equality, Diversity, Equity, and Inclusion
- Social Justice, Human Rights, and Public Policy
- Rural Development and Community Empowerment
- Governance, Public Administration, and Policy Innovation
- Sustainable Supply Chains and Green Logistics
- Agriculture, Food Security, and Agri-Tech Innovations
- Disaster Risk Reduction and Environmental Resilience
- Psychology, Mental Health, and Human Well-being

- Media, Communication, and Digital Society
- Ethics in Artificial Intelligence and Emerging Technologies
- Cross-disciplinary Research Methodologies
- Innovation for the United Nations Sustainable Development Goals (SDGs)
- Global Challenges, International Collaboration, and Sustainable Futures
- Multidisciplinary Approaches to Social Change
- Technology-Enabled Inclusive Development
- Human-Centered Innovation and Digital Inclusion
- Smart Governance and E-Governance
- Future Trends in Multidisciplinary Research and Innovation
